

PlantMobile Program

for pre-K4-12 students

Let Fairchild come to your classroom with an exciting, hands-on experience that supplements your teaching. PlantMobile programs are adapted to grade level and aligned with state and national academic standards.

For more information, visit our website:
www.fairchildgarden.org/plantmobile.

Program Options:

From Roots to Shoots (PreK4-1)

Take a journey into the magical world of plants! Students will explore plants from roots to shoots as they learn about the structure and function of plant parts and how they survive and thrive in their habitats.

Rainforest Relationships

Students examine how intertwined our daily lives are with the rainforest. From medicines and food, to clothing and climate control, students learn how heavily we rely on this delicate ecosystem for our basic needs.

Kitchen Botany: From Flowers to Food

When you eat celery, broccoli, or asparagus, what part of the plant are you eating? Using hand lenses and dissecting tools, students will examine fruits and vegetables to discover the integral relationship between plants, nutrition, and human health.

Plants and Pollinators

Where would we be without pollinators in the world? Students will observe and dissect flowers to understand the intricate relationship between plants and pollinators, as well as an understanding of how our future depends on these important creature.

Program Costs and Registration:

1 hour classroom program; \$100 for up to 30 students.

Additional classroom program on same day; \$75.00 (up to 3 of the same programs a day).

Programs are available Thursdays between 9:00 a.m. and 1:00 p.m.

Accessible to students with special needs.

For scheduling, please call 305.663.8094 or email education@fairchildgarden.org.
